- **Web Console**
Equip your support personnel with anytime access to MobiControl from the Internet with SOTI's new multi-platform web-based Management for devices running on Microsoft Windows.
- **Location Services**
Locate and report device coordinates globally in real time.

Unified Enterprise Mobility Management

Enterprise mobility is a complex management challenge. A combination of purpose-built devices, corporate-liable smartphones and tablets, and BYOD is necessary to drive productivity and business growth, but can be difficult to manage with point solutions. SOTI unifies mobility management from a single management console, removing the complexity from managing a multi-OS, multi-vendor, and multi-purpose mobile ecosystem. SOTI MobiControl is a unified enterprise mobility solution that provides the ability to manage mobile devices, applications, content, email, and security within an enhanced, secure, all-in-one offering.

Manage All Devices from a Single Pane of Glass

With the deployment of consumer smartphones and tablets into corporate-liable, BYOD, and even CYOD programs, enforcing security policies and best practices while supporting diverse user requirements can be a tough balancing act. Enterprise mobility is changing the traditional workplace to an on-demand, virtual environment accessible at anytime, anywhere and from any device.

Secure Access to Corporate Content

SOTI MobiControl's Content Library is the ideal platform for securely distributing and managing corporate content to your mobile workforce. Supporting all major formats, files can be seamlessly delivered one-to-one, one-to-many or one-to-all. Secure Content Library gives you fine-grained control over your content, allowing administrators to set priority levels, document expiry, and location-based delivery.

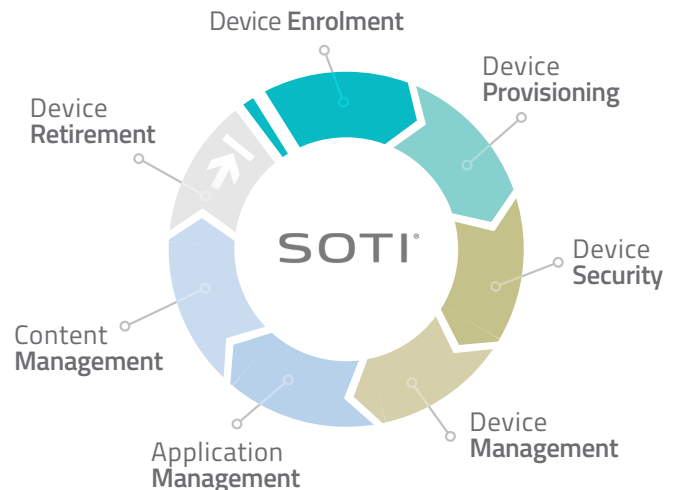

Enable Access & Privacy of Corporate Email

Mobile email management is more than just providing mobile access to your corporate Exchange server. Enterprises must ensure sensitive corporate data stays behind the firewall. With SOTI MobiControl, administrators can create email sharing and forwarding policies to protect against data leakage and inadvertent disclosure of sensitive company information. Comprehensive Exchange Access Controls prevent unmanaged devices from accessing the corporate Exchange server.

Empower Employees with Corporate Applications

Applications are at the center of every enterprise's mobility strategy. Secure access to line of business applications gives employees the tools they need to be more productive and allows enterprises to realize the full potential of a mobile workforce. SOTI MobiControl helps you get the right applications to your mobile workforce in a fast, secure and scalable manner. Enterprise App Catalog gives users a one-stop shopping experience for corporate approved apps. Enterprises looking for more granular control over corporate-liable devices have the added flexibility to silently install mandatory applications. Robust whitelist and blacklist policies provide an extra layer of security across your deployment.

Full Lifecycle of Mobility Management

SOTI is a proven product innovator and EMM Industry leader. Over 15,000 customers across 170 countries rely on SOTI for their EMM needs. We empower the enterprise to take mobility to endless possibilities.
